

FEDIMAR KAYL M. RABANZO

SOFTWARE DEVELOPER | FULL-STACK ENGINEERING | REACT | NEXT.JS | TYPESCRIPT

Olongapo City, Philippines | frabanzoo@gmail.com | 0976 040 9290 | Portfolio: findkaylrabanzo.vercel.app/v3 | GitHub: github.com/kayl06

PROFESSIONAL SUMMARY

Software Developer with **7+ years of experience** building web applications, SaaS platforms, internal systems, and e-commerce solutions. Skilled in **React, Next.js, TypeScript, Node.js, Laravel/PHP, REST APIs, and SQL**. Experienced in full software development lifecycle, from architecture and implementation to deployment and production support. Proficient in **AI-assisted development using Cursor and Claude** to improve engineering efficiency and code quality.

CORE SKILLS

Frontend Engineering: React, Next.js, TypeScript, JavaScript (ES6+), React Native, Expo, Tailwind CSS, HTML5, CSS3, Responsive Design, Accessibility, State Management
Backend & API Development: Node.js, Express.js, Laravel, PHP, REST APIs, Authentication & Authorization, Third-Party Integrations, Payment Integrations, Business-System Integrations
Databases & Data: PostgreSQL, MySQL, MariaDB, Firebase, Redis, Database Design, SQL
Cloud & DevOps: AWS (EC2, S3, RDS), Vercel, Docker, CI/CD, Git, GitHub, Deployment & Production Support
Software Engineering: System Architecture, Feature Development, Technical Planning, Debugging, Refactoring, Performance Optimization, Code Reviews, Testing, Documentation, Production Troubleshooting
AI-Assisted Engineering: Cursor, Claude, LLM-Assisted Development, Code Analysis, Implementation Planning, Debugging, Refactoring, Documentation, Workflow Automation

PROFESSIONAL EXPERIENCE

SOFTWARE DEVELOPER

Chykalophia | Feb 2024 – Aug 2026

- Built and maintained production web and mobile applications using React, Next.js, React Native, TypeScript, Tailwind CSS, Laravel, and REST APIs.
- Translated Figma designs, product requirements, and business workflows into responsive, accessible, and reusable frontend components.
- Developed authenticated dashboards, operational workflows, complex forms, tables, charts, calendars, and data-driven user interfaces.
- Implemented application state management and asynchronous data fetching using Redux Toolkit, RTK Query, TanStack Query, and Zustand.
- Integrated frontend applications with REST APIs and backend services while handling authentication, validation, loading states, and API errors.
- Reviewed and improved existing codebases through reusable component architecture, performance optimization, maintainability improvements, and production troubleshooting.
- Investigated browser, network, API, and application issues using developer tools and production logs; tested fixes and supported reliable releases.
- Collaborated with designers, developers, project managers, and stakeholders in a distributed Agile environment.

FREELANCE FRONT-END, FULL-STACK & SHOPIFY DEVELOPER

E-Commerce and SaaS Clients | Jan 2023 – Present

- Build and customize production Shopify themes using Liquid, HTML, CSS, JavaScript, Online Store 2.0, JSON templates, reusable sections and snippets, metafields, and Git-based workflows.
- Translate Figma concepts into responsive storefront experiences including AJAX cart drawers, product swatches, quick-add flows, bundles, advanced filters, landing pages, upsells, recommendations, and promotional features.
- Implement Shopify Markets, location-based inventory and preorder logic, Klaviyo workflows, third-party apps, Shopify API integrations, and connections to custom business systems.
- Audit and improve mobile usability, accessibility, SEO, Core Web Vitals, cross-browser behavior, theme maintainability, and production reliability.
- Own client requests from discovery and estimation through implementation, QA, deployment, documentation, troubleshooting, and ongoing support.

FULL-STACK WEB DEVELOPER

PlayAsia | May 2022 – Apr 2024

- Developed and optimized responsive customer-facing e-commerce features and internal administration tools within a large production application.
- Built frontend workflows for e-commerce operations, purchasing processes, administrative tools, and customer-facing functionality.
- Integrated frontend features with payment providers and third-party APIs while handling data validation and application state.
- Automated purchasing workflows and developed features that improved operational efficiency and user experience.
- Investigated and resolved production issues across frontend, APIs, and application services.
- Collaborated with developers and stakeholders to implement new functionality while maintaining existing production systems.
- Recommended UI, performance, and technical improvements to improve usability and maintainability.

EARLIER EXPERIENCE

FULL-STACK WEB DEVELOPER

Dunbrae Subic Incorporated | Oct 2020 – May 2022

- Built responsive web applications, dashboards, and business interfaces for internal operational workflows.
- Modernized legacy interfaces and improved frontend usability and maintainability.
- Connected frontend applications to backend services and third-party APIs.
- Developed business workflow automation and data-driven application features.
- Worked with leadership and clients to clarify requirements, investigate defects, and deliver maintainable solutions.

JUNIOR FULL-STACK WEB DEVELOPER

IDESS Interactive Technologies | Jul 2019 – Oct 2020

- Built and maintained e-learning websites and web applications using PHP, JavaScript, jQuery, HTML, and CSS.
- Migrated and modernized legacy PHP and jQuery interfaces.
- Developed synchronization modules connecting web and desktop systems.
- Implemented responsive interfaces and maintained existing production applications.

SELECTED PROJECTS

THE HOPE HOUSE ADMIN

Developed authenticated finance, operations, and user-management dashboards with role-based workflows and third-party integrations.

Technologies: Next.js, React, TypeScript, Tailwind CSS, Redux Toolkit, RTK Query, Laravel REST APIs, MariaDB, Redis, Docker, AWS

TIMEOFF MANAGEMENT

Built a database-driven employee management platform with employee accounts, departments, leave balances, approval workflows, administrative controls, and personal and team calendars.

Technologies: Next.js, React, TypeScript, Tailwind CSS, PostgreSQL, Supabase, Zustand, Google Authentication

CAREDOCS

Developed modular web and mobile workflows for staff and facility management, onboarding, resident records, tasks, billing, calendars, and medication administration.

Technologies: React, React Native, Expo, TypeScript, Zustand, RTK Query, TanStack Query, Formik, Yup, Laravel APIs

SHOPIFY LOOKBOOK

Developed a React-powered Shopify feature that retrieves market-aware product data through the Shopify Storefront GraphQL API and renders reusable storefront components.

Technologies: React, Vite, JavaScript, Liquid, GraphQL, Shopify Storefront API, Shopify Metaobjects

EDUCATION

Bachelor of Science in Information Technology | Gordon College, Olongapo City

Associate in Computer Technology | Gordon College, Olongapo City
