

FEDIMAR KAYL M. RABANZO

SENIOR FULL-STACK SAAS DEVELOPER | TYPESCRIPT | REACT | NEXT.JS | NODE.JS | LARAVEL

Olongapo City, Philippines | frabanzoo@gmail.com | 0976 040 9290 | Portfolio: findkaylrabanzo.vercel.app/v3 | GitHub: github.com/kayl06

PROFESSIONAL SUMMARY

Senior Full-Stack Developer with 7+ years of experience building SaaS platforms, e-commerce systems, internal business applications, dashboards, and API-driven products. Strong across TypeScript, React, Next.js, Node.js, Laravel, REST APIs, PostgreSQL, MySQL, MariaDB, and Supabase. Experienced owning features and applications end-to-end—from requirements and architecture through database design, authentication, integrations, implementation, QA, deployment, and production support. Comfortable working across frontend, backend, data, APIs, and cloud infrastructure.

CORE SKILLS

Languages & Frameworks: TypeScript, JavaScript, React, Next.js, Node.js, Express.js, Laravel, PHP, React Native, Expo

Frontend: HTML5, CSS3, Tailwind CSS, Responsive Design, Accessibility, Component Architecture, State Management

Backend & APIs: Node.js, Express.js, Laravel, REST APIs, GraphQL, AJAX, Webhooks, OAuth 2.0, JWT, HMAC Authentication, Third-Party Integrations

Data: PostgreSQL, MySQL, MariaDB, Supabase, SQL

Cloud & Infrastructure: AWS, Vercel, Docker, CI/CD

Integrations: Shopify, Kipu, CollaborateMD, QuickBooks, Power BI, Microsoft Entra ID, Klaviyo, Payment Services

Development: Git, GitHub, Postman, API Testing, Production Troubleshooting, Agile

PROFESSIONAL EXPERIENCE

SOFTWARE DEVELOPER

Chykalophia | Feb 2024 – Aug 2026

- Built and maintained production web and mobile applications across frontend and backend layers using TypeScript, React, Next.js, React Native, Tailwind CSS, Laravel, and REST APIs.
- Designed reusable application architecture, data-driven workflows, authenticated dashboards, complex forms, tables, charts, calendars, and business interfaces.
- Translated product requirements, business workflows, and Figma designs into maintainable, responsive application features.
- Integrated frontend applications with backend services and third-party APIs, handling authentication, state management, validation, asynchronous workflows, and API error handling.
- Implemented state management and data fetching with Redux Toolkit, RTK Query, TanStack Query, and Zustand.
- Improved existing codebases through component reuse, performance optimization, maintainability improvements, and production troubleshooting.
- Investigated browser, network, API, and application issues using developer tools and production logs, then implemented and validated fixes.
- Collaborated with designers, developers, project managers, and stakeholders in a distributed Agile environment.

FREELANCE FRONT-END, FULL-STACK & SHOPIFY DEVELOPER

E-Commerce and SaaS Clients | Jan 2023 – Present

- Built production web applications, SaaS platforms, e-commerce experiences, dashboards, internal tools, and Shopify storefronts using TypeScript, React, Next.js, Tailwind CSS, Node.js, Laravel, Liquid, and JavaScript.
- Developed features across frontend and backend layers, including business workflows, authentication, API integrations, data management, and responsive interfaces.
- Designed reusable components and frontend architectures for customer-facing and internal applications.
- Integrated REST APIs and third-party platforms including Shopify, Kipu, CollaborateMD, QuickBooks, Power BI, Microsoft Entra ID, Klaviyo, authentication providers, and payment services.
- Built and customized Shopify storefronts using Liquid, JavaScript, Online Store 2.0, reusable sections, snippets, metafields, and metaobjects.
- Implemented e-commerce functionality including AJAX cart drawers, product swatches, quick add, bundles, filtering, recommendations, upsells, cross-sells, and promotional features.
- Worked directly with stakeholders to clarify requirements, estimate work, design solutions, implement features, perform QA, deploy changes, and resolve production issues.
- Optimized applications and storefronts for performance, accessibility, SEO, Core Web Vitals, cross-browser compatibility, and reliability.

FULL-STACK WEB DEVELOPER

PlayAsia | May 2022 – Apr 2024

- Developed and maintained production e-commerce functionality and internal business systems within a large-scale web application.
- Built customer-facing and administrative workflows supporting e-commerce operations, purchasing processes, and internal business functions.
- Integrated application features with payment providers and third-party APIs including PayPal, Worldpay, Reach, and EBANX.
- Developed automation and purchasing workflows supporting internal operational processes.
- Investigated and resolved production issues across frontend applications, APIs, integrations, and application services.
- Collaborated with developers and stakeholders to design and implement new functionality while maintaining existing production systems.

FULL-STACK WEB DEVELOPER

Dunbrae Subic Incorporated | Oct 2020 – May 2022

- Built responsive web applications, dashboards, and business interfaces for internal operational workflows.
- Modernized legacy interfaces and improved frontend usability and maintainability.
- Connected frontend applications to backend services and third-party APIs.
- Developed business workflow automation and data-driven application features.
- Worked with leadership and clients to clarify requirements, investigate defects, and deliver maintainable solutions.

JUNIOR FULL-STACK WEB DEVELOPER

IDESS Interactive Technologies | Jul 2019 – Oct 2020

- Built responsive web applications, dashboards, and internal business interfaces supporting operational workflows.
- Developed frontend features and connected applications to backend services and third-party APIs.
- Modernized legacy interfaces and improved application usability, maintainability, and responsiveness.
- Developed business workflow automation and data-driven application features.

SELECTED PROJECTS

TIMEOFF MANAGEMENT - MULTI-TENANT SAAS - Owned the complete product lifecycle including architecture, database structure, authentication, business workflows, UI/UX decisions, integrations, and deployment.

Technologies: Next.js, React, TypeScript, Tailwind CSS, PostgreSQL, Supabase, Zustand, Google SSO

THE HOPE HOUSE ADMIN - INTERNAL OPERATIONS PLATFORM - Built a centralized platform combining resident, finance, user, and operational workflows through multiple external APIs.

Technologies: Next.js, React, TypeScript, Tailwind CSS, Redux Toolkit, RTK Query, Laravel REST APIs, MariaDB, Redis, Docker, AWS

CAREDOCS APP - WEB & MOBILE APPLICATION - Developed modular web and mobile workflows covering staff and facility management, onboarding, resident records, tasks, billing, calendars, and medication administration.

Technologies: React, React Native, Expo, TypeScript, Zustand, RTK Query, TanStack Query, Formik, Yup, Laravel APIs

EDUCATION

Bachelor of Science in Information Technology | Gordon College, Olongapo City

Associate in Computer Technology | Gordon College, Olongapo City
